THE RELATIONSHIP BETWEEN ADOLESCENT ATTITUDES TOWARDS FREE SEX BEHAVIOR IN GRADE 9 STUDENTS AT SMP PLUS BINA TRAMPIL BOGOR REGENCY IN 2023

Thesis, Department of Midwifery, Faculty of Health Sciences and Pharmacy, Gunadarma University.

Keywords : Behavior, Attitude, Youth, Behavior, Free Sex

Background : Free sex behavior is a problem and at the same time a social phenomenon that is increasingly common in society. According to research (WHO) every year reported 500,000 pregnant adolescents and 70% of them are unmarried (WHO, 2012). **Purpose of the study :** to determine the relationship between adolescent attitudes towards free sex behavior in grade 9 students at SMP Plus Bina Trampil Bogor Regency in 2023. **Research Methods :** The population in this study was 32 respondents, using the technique *total sampling*. Research design with methods *Chi-Square*. **Research Results :** from test *Chi-Square* A significance value of 0.004 ($p\text{-value} < 0.05$) was obtained, which means that there is a relationship between adolescent attitudes towards free sex behavior in grade 9 students at SMP Plus Bina Trampil Bogor Regency in 2023. **Conclusion :** From this study, there is a relationship between adolescent attitudes towards free sex behavior in grade 9 students at SMP Plus Bina Trampil Bogor Regency in 2023. Suggestions from researchers are expected that this study can create a safe and comfortable school environment by supervising and anticipating free sex behavior.
