Title : Workspace Adaptation Due to the Covid-19 Pandemic Case Study of PT. Sarana Multi Infrastruktur Office

Interior Design Study Program, Faculty of Civil Engineering and Planning, Gunadarma University

Number of pages : xvi + 105 + attachments

One of the activities affected by Covid-19 is the activity of working in office buildings, this causes changes or adaptations to the atmosphere and shape of the office space in order to adjust to the environmental situation affected by Covid-19.

The office renovation project of PT Sarana Multi Infrastruktur is one of the interior design work carried out by PT Prapanca Muchtar Design where the author conducts Practical Work that describes a workspace that adapts to Covid-19 and applies the concept of Activity Based Working (ABW), the project is an interesting case study to research and know the changes that occur in the workspace environment affected by Covid-19 and know about the concept of ABW.
