(x + 148)

In 2021, the Regent of Tegal invited DISPORAPAR to discuss the Redesign Plan for the Sport Center Area. The Trisanja Slawi Sport Center area is the largest sports activity center in Tegal Regency. The Trisanja Slawi Sport Center has a strategic function to support the development of sports achievements in Tegal Regency. The existence of a representative Sports Center is hoped by the Tegal Regent to be a means of practicing and competing in various sports such as football, athletics, swimming, basketball, badminton, archery and others.

There is a lack of standardization of football at the Trisanja stadium, therefore it needs a lot of improvements, from the dimensions of the field to improving the infrastructure. The use of national standards in the stadium arrangement concept will improve its performance as a reference venue for holding provincial-scale football matches such as provincial and national sports weeks.

A football stadium means a building that is generally used to hold sporting events, where there is a field or running track surrounded by places for spectators to stand or sit.

The urban forest approach using the analogy method is not just about tracing the shape of an analogous natural object, but requires processes of analysis and assembling them to produce a new form that still has a visual similarity to the analogous object.

Keywords: Redesign, Football, Stadium, Trisanja Slawi Sport Center Area.
