ABSTRACT

Janice Debora Freely Kusumawaty. **An Analysis of Language Styles in *Designated Survivor S1 EP2* Based on Martin Joos' Theory** An Undergraduate Thesis. English Department. Faculty of Letters and Cultures, Gunadarma University. Jakarta. 2024.

Abstract

Language style is relatable in conveying a message, which depends on the formal, semi-formal, or non-formal level. As stated before, the problem of this research focused on language styles applied and the dominant type of language style in *Designated Survivor S1 EP2*. The objective of this research is to determine the kinds of language styles shown and determine the dominant type of language style found in *Designated Survivor S1 EP2*. This research uses words and sentences in monologues and dialogues as the data. To analyze the data based on the language style theory by Martin Joos, the researcher used the descriptive-qualitative method. The result of analyzing the data, the researcher found 129 data, 2 frozen styles, 40 formal styles, 48 consultative styles, 36 casual styles, and 3 intimate styles. The consultative style found as the dominant style in this research due to many existing meetings and negotiations in *Designated Survivor S1 EP2*.
