ABSTRACT

Ilham Putra Paramartha**, The Analysis of Slang Words on Television Series** *Fresh Prince of Bel-Air***.** A Scientific Writing. English Department. Faculty of Letters and Cultures. Gunadarma University. Jakarta, 2020.

Abstract

The aim of this research is to find the types of slang used in the television series *Fresh Prince of Bel-Air* by using the types of slang by Yule. The data of the research were collected from dialogues from season 1 of the television series which contained 25 episodes. The method used for this research is descriptive qualitative since the data are in the form of words, not numbers. The result of this research showed that in 25 episodes, the writer found 10 dialogues that contained slang words in it. The result of this research revealed that out of nine types of slang, the writer found five types, they are Coinage (*three data*), Clipping (*three data*), Compounding (*two data*), Borrowing (*one data*), and Acronym (*one data*). The most dominant types of slang found is *Coinage* and *Compounding*.

Key words: *language, slang, words, television series.*
