THE INFLUENCE OF NON-CASH (QRIS) AND INFLATION ON THE MONEY SUPPLY IN SOCIETY (2019-2023)

Scientific Writing Management Study Program, Faculty of Economics, Gunadarma University 2024

ABSTRACT

The purpose of this study is to analyze the effect of non-cash transactions (QRIS) and inflation on the money supply in the community (2019-2023).

The analysis method in this research uses secondary data, the test stages carried out are: descriptive statistical test, normality test, autocorrelation test, multicollinearity test, heteroscedasticity test, multiple linear regression test, hypothesis test (f statistical test and t statistical test) and the coefficient of determination. The data used in this research uses data for the period 2019 to 2021 obtained through the official website of Bank Indonesia (BI) and the central statistics agency (BPS). The testing tool used is SPSS.

The results showed that non-cash variables (QRIS) and inflation had no effect partially or simultaneously on the money supply (JUB).

Keywords: Non-Cash (QRIS), Inflation, Money Supply (JUB) (M2), Covid-19
