DESIGN AND DEVELOPMENT OF THE OFFICIAL WEBSITE ‘SAHABAT EMPAT KAKI’

Scientific Writing, Informatics, Faculty of Industrial Technology, Gunadarma University, 2023.

Keywords: *Adoption, Dog, Website, HTML, CSS, Javascript*

(xi + 45 + appendix)

Dogs are popular pets today, and many dog lovers want to have them as companions. One way to own a dog is by adopting it from a shelter. One of the dog adoption centers in the Pondok Gede area is ‘Sahabat Empat Kaki’. Currently, Sahabat Empat Kaki does not have an official website. The absence of an official site limits the promotion and display of information regarding the dogs available for adoption. A website is a collection of pages displaying information or data in the form of text, images, animations, sounds, videos, and can be static or dynamic. The official Sahabat Empat Kaki website was built using Visual Studio Code software. The goal is to display information about the dogs available for adoption, including their vaccination status and physical condition. The website can be accessed by typing the URL <https://sahabat-empat-kaki.vercel.app/>, which allows visitors to get closer to Sahabat Empat Kaki. The Sahabat Empat Kaki website was built using the Bootstrap Framework.
