

Abstract

Suci Rahmelia. 31108877

THE CREATING OF MODULE WIDGET AND LAYOUT TOOLKIT QT DESIGN-ER.

Jurusan Manajemen Informatika Direktorat Program Diploma Tiga Teknologi Informasi, Universitas Gunadarma, 2012.

Keywords : Widget, layout

(x+ 64+ appendix)

Qt is a cross-platfrom library which provides a toolkit to build applications based on GUI (Graphical User Interface) or non-GUI (console/commad line interface) with the effective and efficient cross-platform operating system (eg Linux, Machintosh, Windows). Capabilities provided by the Qt development framework to make it a base programming language C++ or any other language bindings with some software that is "portable" with high performance. Qt is classified as open-source software with dual licensed; the *General Public License* (GPL) and the *Qt Public License* (QPL).
