Making the E-Commerce Site Alika Shop

PI. Department of Information Management. Faculty of Computer Science and Information Technology. Gunadarma University. 2015.

Keywords: Site, Internet, Online Stores

(Xii + 78 + Appendix)

Alika Shop is one type of business that is attractive to run, because the product seller fashion, beauty and accessories gadgets in Indonesia that currently popular, while everyone has different needs depending, by because it is the presence of shopping web, more easier for someone to gain their respective needs. Making this site using a Content Management System (CMS) which is a software for making site.

At this writing there is a navigation structure to explain the pages that are on the site. There is also the Indonesian way of installation, configuration of payment, delivery configuration, product manufacturing, the manufacturing category, displaying products and upload the site to hostinger.

This site has been created and has been uploaded to hostinger in order to extend the promotion. At this site there are still many shortcomings, especially in the matter of payment and range centered only in Indonesia. This site can be viewed by the domain <http://alikashop.esy.es/>
