Keyword : *Web*, Nur Qurban, Services.

*(xiii + xx + 98 attachment)*

(Description). Based on these problems, the researcher wants to create a website that can be used to store all customer data who ordered kurban animal's using the SDLC (System Development Life Cycle) method. The stages consist of system planning, system analysis, system design, system selection, and system implementation. This application can be accessed easily by the user using a web browser that is connected to the internet network through the address <http://nur-qurban.epizy.com/>.
