DESIGN AND CONSTRUCTION OF AN ANDROID-BASED HIJAIYAH LETTERS LEARNING APPLICATION USING CODULAR

Keywords: Android, Application, Learning to Recite the Koran, Hijaiyah Letters, Learning.

(xii + 38 + Attachments)

Making the Koran Learning application discusses learning hijaiyah letters. This research aims to help parents introduce hijaiyah letters to their children. Apart from that, it can make it easier for users to learn hijaiyah letter material and its punctuation anywhere and anytime. Users can use this Koran Learning Application to view material in the form of hijaiyah letters and is equipped with hijaiyah letter practice questions to hone the user's skills. This Koran Learning Application was created using Kodular. The method used in this research is the System Development Life Cycle (SDLC) method, which consists of planning, analysis, design, creation and implementation as well as testing. This application can be an alternative media besides books in learning hijaiyah letters and can make it easier for parents to teach hijaiyah letters to their children.
