DESIGN LUNAR KITCHEN BASED ON WEBSITE USING HTML CSS PHP JAVASCRIPT DAN MYSQL

Scientific Writing Information Systems, Faculty of Computer Science and Information
Technology, Gunadarma University. 2023.

Keyword : Application, Online, Paste, Website.

(ix + 40 + Attachment)

Lunar Kitchen is an online-based business that sells several homemade pasta-based dishes. It started with the idea of making homemade pasta for the family but it turns out that there is a business opportunity there. Without losing its distinctive self-made image, Lunar Kitchen always maintains the quality of their products. The purpose of this writing is to create an information system to make it easier for customers to make order. based on experience. The method used in the preparation of scientific writing is the System Development Life Cycle (SDLC) method consisting of 4 main stages, namely the Analysis Stage, the Design Stage, the Implementation Stage, and the Testing Stage. it will be created using HTML, PHP, MYSQL, JAVASCRIPT dan CSS. Bootstrap framework and text editor using Visual Studio Code. This website application has been successfully created and tested which has the url address
