*At this time, the development of technology and computers is growing very rapidly, especially in the field of Android applications. Mama Nala Project is an MSME that sells foods such as gyoza mentai and dimsum mentai. Mama Nala Project currently markets their products only through social media. Mama Nala Project requires an application to market their products using internet media so that customers can easily get complete information about the available menus and make transactions with Mama Nala Project. The purpose of making this application is to make it easier for Mama Nala Project to market their products and also make it easier for customers to get information and make transactions with Mama Nala Project online. The method used in making this application is the System Development Life Cycle (SDLC) method. This application has been through testing using the Blackbox Testing method. Testing shows the application has met the needs and is feasible to use.*
