Injeuni Portal (Indonesia Sijeuni) for Website-based Boy Group Neo Culture Technology (NCT) Fans from Korea using the PHP & MySQL program

Scientific Writing. Computer Systems / Information Systems. Faculty of Computer Science and Information Technology. Gunadarma University.

Keywords: Boygroup, Fans, K-POP, Music , Portals

(xvii + 74 +  Appendix)

The influence of globalization has introduced South Korean (South Korean) culture to Indonesia, including in aspects of music such as K-Pop. K-Pop, which is a Korean pop genre, features well-known boy groups and girl groups such as Super Junior, Blackpink, BTS, and Neo Culture Technology (NCT) with 23 members and various sub-units. NCT is highlighting talents and skills in various fields, achieving international popularity through energetic songs and innovative concepts. In this context, the author seeks to address the lack of information for NCT fans, or "NCTzens," in Indonesia by creating the Injeuni Portal. This portal provides special information about NCT, including members, units, albums, partnerships, and achievements for free. Unlike the official website which involves various artists under SM Entertainment, Injeuni Portal focuses more on NCT. The writing method involves the stages of planning, designing, creating, testing, and implementing a website with PHP and the Bootstrap framework. This research is expected to be an alternative for Indonesian NCTzens in obtaining relevant information about the NCT Boygroup more easily, making the Injeuni Portal a useful and accessible source of information for Boy Group Neo Culture Technology (NCT) fans in a website-based format. Several stages in the creation of this website include Website Overview, Website Planning, Website Design, Website Creation, Testing and implementation. The trial was carried out in 3 stages, including the blackbox trial. Browser trials, user satisfaction trials, using the UAT method, the results obtained were 88% stating that the web was successfully used and as expected. The following is a website link that has been hosted and can be accessed by users http://protalinjeuni.infinityfreeapp.com/index.php
