PROTOTYPING METHODS ON THE MIE ACEH 68 WEBSITE USING THE LARAVEL FRAMEWORK

Restaurant Mie Aceh 68 which is in Cilegon, Banten, is a business unit in the culinary sector that serves dine in. Mie Aceh 68 provides various Acehnese specialties such as Acehnese noodles, Acehnese fried rice, and many more. Mie Aceh 68 often faced difficulty at serving orders to the customer, the difficulty is when the waiter asked the customer for their orders and also when the customers who have been waiting too long in line or when they wait for their order. In addition, the waitress still writes down the orders manually, thus increasing the possibility of making the wrong order or losing the paper. To anticipate this, an ordering website was created. This website is designed using the PHP programming language, Laravel framework, and MySQL. The method used is Prototyping Method, there are gathering requirements, designing, and evaluating Prototypes. Testing was done to the system using the Black Box Testing method and it can be concluded that the Mie Aceh 68 website can function properly.
