WEBSITE-BASED APPLICATION TO READ MANGA IN INDONESIAN USING PHP AND MYSQL

(x + 53 + Attachment)

Manga is a term for comic books from Japan that have many fans, not only from Japan, but from various other countries. Dark Fantasy Manga is a website that provides various kinds manga to be read online and for free. Dark Fantasy Manga exists because many manga connoisseurs have trouble getting the manga they want to read. This is also complicated by the fact that not all manga are circulating in Japan translated and published also in other countries. Dark Fantasy Manga is web-based application created using the PHP programming language, with bootstrap assistance as an interface, and MySQL as a database, website Dark Fantasy Manga can be accessed via the URL https://darkfantasymanga.000webhostapp.com/. The benefits of this website are make it easy for manga lovers in Indonesia who want to read manga online and for free so they no longer need to buy manga in physical form. This website has been tested using the Blackbox method testing. Testing shows the website has met the needs and worth using.
