The Pomodoro Technique Application as a Time Management Solution is an application that is useful as a tool to help users manage their time as well as possible. The method used in this study is the System Development Life Cycle (SDLC) method. Time management is the process of controlling time based on a series of activities that have been planned and have been considered based on the possibilities which must then be controlled in the process so that it is maximized. Time management is needed so that someone can complete a job properly. Therefore it is important for someone to do time management so that it can help someone in working to succeed in achieving the goals to be achieved. One of the time management techniques is to use the Pomodoro technique. Therefore the author makes the Pomodoro Technique Application as a Website-Based Time Management Solution using the Python programming language and Stream lit as a framework. This application has been successfully created and can be accessed on the site *https://pomotime.herokuapp.com/* via a personal computer or mobile phone.
