     Dramaga Pratama Clinic is one of the clinics located in the Dramaga Pratama housing area, Cibadak Ciampea, Bogor District. The clinic still uses manual registration using paper and not online. so the patient must come to the clinic or contact the clinic. In addition, patients who register sometimes have to wait a long time to register due to the large number of registrations.

     This website was created with the aim of making it easier for patients to register and get information about what services are provided by Dramaga Pratama Clinic. By registering online, it can reduce long lines and make patients not wait long in the administrative process. The method used in this paper is the SDLC method which consists of 5 stages, namely planning, analysis, design, implementation, and testing. This website uses PHP programming languages and Visual Studio Code as text editors. Patients who access the website of Dramaga Pratama Clinic can register anytime and anywhere. In addition, information about what services can be provided by the clinic can be known by patients.

     The online registration web of Klinik Dramaga Pratama can be accessed through the address of the https://klinikdramagapratama.my.id/ *and for patients and* *https://klinikdramagapratama.my.id/admin* *for admin. Testing carried out using the blackbox testing method results in that every menu, form, action contained in the website has no errors and can run properly according to its function.*

Bibliography (2012 – 2022).
