FRAMING ANALYSIS OF REPORTS OF THE ARRANGEMENT OF THE TERRORIST FARID OKBAH IN TVRINews.COM ONLINE MEDIA FOR THE PERIOD OF 18-19 NOVEMBER

Keywords : Framing, Construction, Ideology, TVRINews.com

(xii + 77 + Appendix)

This study aims to find out how TVRINews.com constructs news of the arrest of the terrorist Farid Okbah for the period 18-19 November 2021 and to find out the ideology of TVRINews.com in the news. In this study, a qualitative approach was used by using data collection methods and using interview and observation instruments. Observation of the text was carried out to see in its entirety the facts developed by TVRINews.com. The framing theory used is the theory of framing analysis by Robert N. Entman. This model explains how to define problems (defining problems), diagnose causes (estimate the causes of problems), make moral judgments (make moral decisions or moral values), and treatment recommendations (emphasize solutions) in reading the framing of a text that is displayed. The technique used is a field research technique in the form of in-depth interviews. The results of this study indicate that TVRINews.com as a media under the auspices of the government has an ideology in accordance with the 1945 Constitution or the purpose of the state, namely to educate the nation's life and provide information. Then in constructing the news on the arrest of the terrorist Farid Okbah, TVRINews.com must adhere to the principle of presumption of innocence and justify this report as if the accusations related to institutions or figures were true and put the rules of journalistic rule at the forefront.
