UNDERSTANDING THE MEANING OF THE HIJAB ON WOMEN USERS VAPE

Keywords : Significance, Hijab Women, Vape, Self Disclosure

(xlv + 70 + appendices)

The purpose of this research is to know the meaning and understanding of women's experiences on the hijab in using a vape in the community of Hijab Vapers Indonesia in the Jabodetabek area. This research uses qualitative interpretive paradigms and approaches. In this study, data gathering techniques being performed is to conduct interviews and observations. This research uses theories of self disclosure explaining that self-disclosure is a process presents the self manifested in the activities of share information, feelings with others. The results of this study of openness themselves indicate that they feel comfortable being a hijab vapers even though they own is a women's hijab. They find it to be a hijab vapers makes them more comfortable compared to what they did in the past that evoke a sense of less comfortable. Experience inconvenience arising in them in the past is because there are some of them which was formerly an addict smoking a conventional and a very hated by the conventional cigarettes. It arises from his past who wanted to stop being an addict smoking conventional, his desire to be a hijab tricker vapers can result from the artful smoke vape. In addition they also tend to ignore what society told them by arguing that, hijab and vape is two different things and cannot be assessed together.
