Utilization of Twitter Social Media as a Self-Disclosure of Teenagers in Mustika Jaya Bekasi City

Keywords: Twitter, *Self Disclosure*, Remaja

(xiii + 90 + Lampiran)

Self-disclosure mostly happens to teenagers on social media, one of which is Twitter. Twitter is a text-based media platform that is open to be owned and used by many people. For teenagers, Twitter social media is considered an online diary. This study aims to determine how Twitter is used as a self-disclosure by adolescents in Mustika Jaya Bekasi City. This research uses descriptive qualitative research methods by conducting observations, interviews, and documentation on late adolescents aged 18 to 21 years. In this study, the theory used is Johari window theory. The results of this study explain that self-disclosure carried out by adolescent of Mustika Jaya Bekasi City has different levels of openness. On Twitter social media, teenagers can freely express themselves and share their personal information in the form of self-disclosure, outpouring, feelings, thoughts, and their relationship with followers and following. In the self-disclosure that occurs, Mustika Jaya adolescent can get know themselves better, relieve feelings in their minds, filtering and reducing the emotional level in teenagers.
