***Framing Analysis of Johnny G Plate's Corruption Case on Kompas.com and Detik.com Media***

***Keywords:*** *Framing Analysis, Social Reality Construction, Johnny G Plate.*

(xi + 102 + 7 - A)

*This research aims to look at the construction of reality realized by the media portals Kompas.com and Detik.com in reporting on the corruption trial of the BTS 4G tower infrastructure project, Bakti Kominfo, which was conducted by Johnny G Plate, 19 October – 08 November 2023 edition. Using a qualitative research approach and social reality construction theory. The data analysis technique used is Robert N Entman's framing analysis method which recognizes 4 types of elements, namely; (1) Defining the Problem, (2) Diagnosing the Cause, (3) Moral Assessment, (4) Treatment Recommendations. The results show that Kompas.com and Detik.com not only act as information providers, but also carry out their function as 'watchdogs' or guards. Kompas.com in its reporting tends to be more formal and focuses on general facts at the trial. Meanwhile, Detik.com attaches general data and also includes clickbait in its articles. The two media portals did not offer a resolution to this case because it had been resolved by the Attorney General's Office.*
