ANALYSIS INFORMATION SYSTEM IN INDONESIA INSTITUTE OF
SCIENCE WITH SWOT ANALYSIS (A Case Study in Political LIPI Research
Center for Documentation and Information Online Catalog)

Thesis Department of Business Information Systems, Master of Information
Systems Management Gunadarma University, 2013

(xi + 71)

Center for Political Studies (P2P-LIPI) has 2 (two) online information systems as a means of spreading knowledge and information from the research results of the research on P2P-LIPI site (www.politik.lipi.go.id) and online catalogs P2P-LIPI (www.library.politik.lipi.go.id).

Both of these systems are running, but it has shortcomings in its use so that the information obtained is less than the maximum. Problems that occur in this system led to increasing complaints against the system. This study aims to analyze both the online system by using SWOT analysis to get the advantages and disadvantages of the system.

Results and conclusions of this research is SWOT position information system and online catalog websites P2P-LIPI in a state describes the condition of weak internal and external conditions are less supportive of that direction, goals, and strategies to promote compliance is of a defensive nature, such as maintaining the existence of (survival Strategy).

Keywords: Site, Online Catalog, SWOT.
