Research Title : Optimizing the Development of E-Procurement in the Public Auction System Pascakualifikasi With One System Covers and Autumn Period (Concept and Design Development as a Function Control) Case Studies in the Ministry of Public Works

Keywords : Online Services Procurement

The interaction between government and society in the implementation of governmental tasks and development, requires the existence of an optimal service system, effective, and efficient. Specifically for the business world into the field of construction services-PU's, then the government, in this case the Ministry of Public Works, required to give service in a transparent and impartial, so as to create healthy competition climate.

E-procurement of goods and services on line over the Internet be the perfect solution. E-procurement without requiring lengthy and convoluted bureaucracy that will get the direct supervision of the community.

To overcome this problem the authors use electronic media more transparent, accountable, effective and efficient, and control functions in an effort to eradicate corruption, collusion and nepotism, as well as the effort to prepare the national service providers to meet the challenges and global developments, although fully still have to wait for enactment Act governing electronic transactions (Cyber Law) in Indonesia.

The author tries to implement an online application will provide the basis of national law to guarantee the legality of electronic documents as well as the element of legal protection for the confidentiality of documents that are considered necessary and the protection of copyright for system integration to related parties, besides of course the condition of both infrastructure software and hardware.

Efforts to improve human resource capabilities for service providers and service users to better understand the application of the procurement process of goods / services of electronic government (e-procurement), as well as to reduce the occurrence of corruption to be more transparent and impartial healthy competition, thereby reducing the objections, complaints and suggestions through the column suggestions and complaints in PU Net, in the Ministry of Public Works.
