ANALYSIS OF FINANCIAL PERFORMANCE OF THE PROVINCIAL GOVERNMENT OF DKI JAKARTA FOR FISCAL YEAR 2014-2018

Thesis. Faculty of Economics. 2020
Keywords: Regional Government Financial Performance, APBD, Local Budget Realization Report, and Financial Ratios

Regional financial performance appraisal is the level of achievement of a work result in regional finance which includes regional revenues and expenditures using a financial system that is determined by means of a policy or statutory provision during one budget period. This study aims to determine the financial performance of the Regional Government of DKI Jakarta for the 2014-2018 Fiscal Year based on the ratio of the degree of decentralization, the ratio of regional financial independence, the ratio of effectiveness, the ratio of efficiency, the ratio of activities, the ratio of PAD contribution and balance funds to regional spending, and growth ratios.

The data collection method used is to use the documentation method, which is to collect the data to be examined in the form of the 2014-2018 DKI Jakarta Budget Realization Report through the website https://bpkd.jakarta.go.id/. The analytical tools used include the ratio of the degree of decentralization, the ratio of regional financial independence, the ratio of effectiveness, the ratio of efficiency, the ratio of activities, the ratio of PAD contribution and balance funds to regional spending, and the ratio of growth.

The results showed that the ratio of financial performance was good except for the effective ratio because the DKI Jakarta Government did not optimize the local revenue obtained and the activity ratio caused by the DKI Jakarta Government to prioritize operational expenditures over development expenditures.
