ABSTRACT

Abstract

There are various psychological conditions ever present in a human, one of them is the personality types. Fictional characters are said to mimic actual human, meaning that they too have personality types. This research was done to find Meilin “Mei” Lee’s personality types shown in Turning Red movie using psychological types theory proposed by Carl Jung. This research used Turning Red movie as the data source and its dialogue spoken by the characters also actions done by Meilin “Mei” Lee as the primary data. The method used was qualitative descriptive method to describe the data as it is. The result of the research showed that out of eight possible types, Meilin “Mei” Lee has seven conscious psychological types. With total 28 data, 3 data are extraverted thinking, 6 data of introverted thinking, 2 data show extraverted feeling, 4 data are introverted feeling, 7 data of extraverted sensation type, 3 data are introverted sensation, and 3 data show extraverted intuition type. Thus, left one type, introverted intuition type, as her unconscious psychological type since she has never shown any of the type’s characteristics.

Keywords: Jungian psychological types, personality types, psychological types.
