APPLICATION FOR REGISTRATION OF WEB-BASED CANDIDATE AND PROGRAMMER ON THE MIDDLE MANAGEMENT LABORATORY GUNADARMA UNIVERSITY

PI. Technical Information. Faculty of Industrial, Gunadarma University, 2019

Keyword: Assistant and Programmer, Recruitment, Middle of Management

(xiii + 66 + Officials)

The Middle Management Laboratory is a work unit that is part of the faculty of economics at Gunadarma University. Every year the Management Laboratory issues new registrations and new Programmers to join the Middle Management Laboratory. In the registration process that has been carried out so far, it still uses a conventional system using paper media, so there needs to be a change in the system from conventional to digital systems. In a digital system that is needed in the application of registration assistant and laboratory management programmers who are easier to use paper and easier to manage the data of prospective assistants and programmers. In this application it is expected that prospective assistants and programmers do not need to print their data as paper media registration requirements. All can be done through a laptop by simply uploading the requirements that are already in the application so that it provides the registration process. This web-based application is made using notepad ++ text editor and uses PHP, HTML, CSS and bootstrap programming languages to make the application look more attractive and responsive.
